Ocean rowing grabs a student's attention through extreme adventures, innovative technologies and close encounters with nature. The expedition team uses North America's most advanced rowboat as home, laboratory and life-support in a grand ocean.

With pioneering satellite communications **OAR Northwest** is able to connect families, students and classrooms to the craft. Education programs launch with dynamic school assemblies which address leadership, conflict resolution, teamwork, geography, history, oceanography, science, technology, engineering and mathematics.

**OAR Northwest** programs aim to motivate student learning, and the approach is to make students active participants in the learning process.

## School Programs

**Exploring:** Free – Classrooms and families follow the expeditions. Click the "Follow" tab to register.

**Adventuring:** \$994.00 – Students will:

- Meet expedition team members at school assemblies before OR after the expedition
- Climb aboard specialized rowing vessel to experience shipboard living
- Communicate with expedition team via email
- Engage in an interdisciplinary curriculum
- Analyze water, sleep and whale study data

**Voyaging:** \$1994.00 – Above plus:

- Meet expedition team members at school assemblies before AND after the expedition
- Teach family members about rowboat expeditions during after-school events
- Pen-pal participating students living in Canada, USA and First Nations
- Speak with expedition team using satellite technologies

**Assembly Capacity: 100; Competitive Grants Available**

Request grant applications: Info@OARnorthwest.com ; 206-316-0586

Grant funding provided by: Seattle Yacht Club Foundation; Pacific Marine Foundation

**-- Contact OAR Northwest for community, group and alternative school events. --**
